

The Utah Association of Health Underwriters in Conjunction with SelectHealth and HealthEquity Present:

THE DEFINED CONTRIBUTION MARKET AND THE MECHANICS OF THE UTAH HEALTH EXCHANGE

The Patient Protection and Accountability Act (PPACA) recently signed into law makes State Exchanges extremely important to those in the health insurance marketing community. In Utah, we are fortunate to have an Exchange already in place and open for business to all small employers January 1, 2011.

Recent enactments to Utah State Law put new requirements on Producers wishing to enroll their clients into the Utah Health Exchange. These requirements include the attendance of a Defined Contribution training session approved by the Utah Insurance Department. This course meets these requirements as well as providing two hours of CE toward a Producer's licensing renewal criteria.

Small employers wishing to receive a quote through the Utah Health Exchange need to have their request submitted no later than September 30, 2010. For this reason, it is imperative that you attend a training session in time to properly inform your clients interested in receiving a bid.
